

KLIPAIR brings a new olfactory perspective to your confined or semi-confined space in order to acquire comfort, well-being, calmness and security. Why? Because the sense of smell is highly charged in emotional value. We communicate with the right brain, the emotional center. Our olfactory memories last for years while visuals only last for months.

EXAMPLES OF APPLICATIONS

Applications are emerging in many different areas. KLIPAIR will help you create an olfactory environment of well-being or remove unpleasant smells :

- Air treatment to provide olfactory well-being and comfort in retirement homes.
- Comfort and improved environment in your office space, meeting and waiting areas.
- Fresh and clean essential oil based compositions to destroy unpleasant smells in spaces such as fitting rooms, changing facilities, staircases, collective or public toilet facilities...
- Pleasant fragrant environment in reception areas and hallways in hotel and services sectors.

CUSTOMIZATION AND FLEXIBILITY

You want a personalized fragrance that reflects the personality of your brand?

Our expertise engages in creating a unique scent signature, according to your desires and requirements.

You would like to personalize your scent diffuser?

We will work with you to apply the best solution to respond to your needs and meet your requirements.

You already have an olfactory identity or a liquid process that you can't efficiently and securely spray?

We combine our optimum quality spraying technology and patented diffusion system to bring viable olfactory solutions.

KLIPAIR is a liquid pulverization specialist, engaging in ongoing research of diffusion of liquids.

Our innovative and patented diffusion technology sets new standards on the pulverization market due to our clean, economic, qualitative and homogeneous nebulization.

We are committed to the security, quality and sustainable development of our products.

KLIPAIR's major focus is to promote well-being while answering to all olfactory and pulverization concerns.

KLIPAIR is truly at your service.

SCENT DIFFUSER MIKROAIR

MIKROAIR is a pioneering concept and patented spray system, addressing the following concerns:

- Fragrance diffusion in order to develop an atmosphere of well-being, security and comfort.
- Fighting against pollution and destruction of unpleasant odors.
- Diffusion of liquids for various applications.

MIKROAIR is a mix of the core values that drive our company:

• TECHNOLOGICAL INNOVATION:

- Commitment to the environment in line with a comprehensive eco-design approach in compliance with the circular economy principle.
- Wireless connected application.
- Remote management via a dedicated computer interface (PC, tablets, smartphones...).
- Patented diffusion system.
- Box and cartridge with Plug-and-Play system.
- Very low consumption: 1 ml/hour.

• QUALITY:

- Manufactured with noble and biocompatible materials.
- No propelling of greenhouse gasses.

• SECURITY:

- Strict respect of the highest safety standards to ensure users full security.

Our products are guaranteed 100 % made in France: engineering, research office, manufacturing, assembly and fragrances.

TECHNICAL CHARACTERISTICS

The scent diffuser **MIKROAIR** is composed of 2 elements, the box **1** and the cartridge **2**.

The **KLIP-R200** cartridge consists of 3 separate parts: the tanker, the micro compressor, the electronic control and management device. The micro compressor and the electronic device are completely separate from the tanker, ensuring safe manipulation of the cartridge.

CARTRIDGE

- Recyclable plastic material. 
- Innovative and patented diffusion system.
- Singular use.

TECHNOLOGY

- Spray with no deposit (wet spray).
- Cold process with no propelling of flammable or greenhouse gasses.

SECURITY

- Secure and hermetically sealed cartridge.
- Encoded electronic security for each user.

INTEGRATED SYSTEM

- **KLIP-R200** cartridge is self sufficient.
- Intelligent device with wireless connexion:
 - client automatic identification,
 - operates and prevents a further use,
 - additional functions can be integrated upon request.

AIR TREATMENT MODULE

- Patented system.
- Liquid consumption from 0,5 to 1 ml/h.
- Air treatment from 20 to 100 square meters.
- Cartridge autonomy: 2 to 4 months on average.

DIMENSIONS

- H 23 cm x L 9 cm x D 8 cm.
- Door clearance width: 21 cm.

POWER SUPPLY

- 12 V / 1 A (AC adaptater: 110/220 V)

WARRANTY

- **MIKROAIR** box: 1 year.
- **KLIP-R200** cartridge: 6 months.
